## Volume 98 (1999)

**Actin filament reorganization**; Phosphatidylinositol 4,5-bisphosphate; Phosphatidylinositol monophosphate kinase; Phosphatidylinositol 4,5-bisphosphate 5-phosphatase; Malignant transformation **98**, 13

**ADP-ribosylation factor**; Phospholipase D; Phosphatidic acid; Phosphatidylinositol (4,5)bisphosphate; Diacylglycerol; Vesicle transport **98**, 141

**Apoptosis**; Signal transduction; Phospholipase D; Differentiation **98**, 153

**ARF**; Phospholipase D; PLD1; PLD2; Rho; Protein kinase C **98**, 127

**Brain**; Diacylglycerol kinase; Molecular cloning; In situ hybridization **98**, 109

**Calcium**; Inositol; Neurone; Inositol 1,3,4,5-tetrakisphosphate **98**, 49

**Diacylglycerol kinase**; Molecular cloning; Brain; In situ hybridization **98**, 109

**Diacylglycerol kinases**; Signal transduction; Phosphatidic acid **98**, 95

**Diacylglycerol**; Phospholipase D; Phosphatidic acid; Phosphatidylinositol (4,5)bisphosphate; Vesicle transport; ADP-ribosylation factor **98**, 141

**Differentiation**; Signal transduction; Phospholipase D; Apoptosis **98**, 153

**Exocytosis**; Phosphatidylinositol; Phospholipase C; Vesicle formation; Phosphoinositide 3-kinase; Signal transduction **98**, 23

**G protein**; Phosphoinositide 3-kinase; Signal transduction; Tyrosine kinase **98**, 79

**G protein**; Pleckstrin homology domain; Membrane association; Ins(1,4,5)$P_3$; Phosphoinositide **98**, 35

**haloperoxidase**; Phosphatidic acid phosphatase (type 2); Signal transduction; Plasma membranes; phosphatase superfamily **98**, 119

**Inositol**; Calcium; Neurone; Inositol 1,3,4,5-tetrakisphosphate **98**, 49

**Inositol 1,3,4,5-tetrakisphosphate**; Inositol; Calcium; Neurone **98**, 49

**In situ hybridization**; Diacylglycerol kinase; Molecular cloning; Brain **98**, 109

**Ins(1,4,5)$P_3$**; Pleckstrin homology domain; Membrane association; Phosphoinositide; G protein **98**, 35

**Lipid kinase**; Phosphatidylinositol; Phospholipids; Signal transduction; Second messengers **98**, 69

**Malignant transformation**; Phosphatidylinositol 4,5-bisphosphate; Phosphatidylinositol monophosphate kinase; Phosphatidylinositol 4,5-bisphosphate 5-phosphatase; Actin filament reorganization **98**, 13

**Membrane association**; Pleckstrin homology domain; Ins(1,4,5)$P_3$; Phosphoinositide; G protein **98**, 35

**Membrane traffic**; Phosphoinositide; Zinc finger; PI 3-kinase; Signal transduction **98**, 87

**Molecular cloning**; Diacylglycerol kinase; Brain; In situ hybridization **98**, 109

**Neurite outgrowth**; Synaptotagmin; Neurotransmitter release **98**, 59

**Neurone**; Inositol; Calcium; Inositol 1,3,4,5-tetrakisphosphate **98**, 49

PII: S0009-3084(99)00036-5

**Neurotransmitter release**; Synaptotagmin; Neurite outgrowth **98**, 59

**phosphatase superfamily**; Phosphatidic acid phosphatase (type 2); Signal transduction; Plasma membranes; haloperoxidase **98**, 119

**Phosphatidic acid**; Diacylglycerol kinases; Signal transduction **98**, 95

**Phosphatidic acid phosphatase (type 2)**; Signal transduction; Plasma membranes; haloperoxidase; phosphatase superfamily **98**, 119

**Phosphatidic acid**; Phospholipase D; Phosphatidylinositol (4,5)bisphosphate; Diacylglycerol; Vesicle transport; ADP-ribosylation factor **98**, 141

**Phosphatidylinositol 4,5-bisphosphate 5-phosphatase**; Phosphatidylinositol 4,5-bisphosphate; Phosphatidylinositol monophosphate kinase; Actin filament reorganization; Malignant transformation **98**, 13

**Phosphatidylinositol 4,5-bisphosphate**; Phosphatidylinositol monophosphate kinase; Phosphatidylinositol 4,5-bisphosphate 5-phosphatase; Actin filament reorganization; Malignant transformation **98**, 13

**Phosphatidylinositol (4,5)bisphosphate**; Phospholipase D; Phosphatidic acid; Diacylglycerol; Vesicle transport; ADP-ribosylation factor **98**, 141

**Phosphatidylinositol monophosphate kinase**; Phosphatidylinositol 4,5-bisphosphate; Phosphatidylinositol 4,5-bisphosphate 5-phosphatase; Actin filament reorganization; Malignant transformation **98**, 13

**Phosphatidylinositol**; Phospholipase C; Exocytosis; Vesicle formation; Phosphoinositide 3-kinase; Signal transduction **98**, 23

**Phosphatidylinositol**; Phospholipids; Lipid kinase; Signal transduction; Second messengers **98**, 69

**Phosphoinositide 3-kinase**; G protein; Signal transduction; Tyrosine kinase **98**, 79

**Phosphoinositide 3-kinase**; Phosphatidylinositol; Phospholipase C; Exocytosis; Vesicle formation; Signal transduction **98**, 23

**Phosphoinositide**; Pleckstrin homology domain; Membrane association; Ins(1,4,5)$P_3$; G protein **98**, 35

**Phosphoinositide**; Zinc finger; PI 3-kinase; Membrane traffic; Signal transduction **98**, 87

**Phospholipase C**; Phosphatidylinositol; Exocytosis; Vesicle formation; Phosphoinositide 3-kinase; Signal transduction **98**, 23

**Phospholipase D**; Phosphatidic acid; Phosphatidylinositol (4,5)bisphosphate; Diacylglycerol; Vesicle transport; ADP-ribosylation factor **98**, 141

**Phospholipase D**; PLD1; PLD2; ARF; Rho; Protein kinase C **98**, 127

**Phospholipase D**; Signal transduction; Differentiation; Apoptosis **98**, 153

**Phospholipids**; Phosphatidylinositol; Lipid kinase; Signal transduction; Second messengers **98**, 69

**PI 3-kinase**; Phosphoinositide; Zinc finger; Membrane traffic; Signal transduction **98**, 87

**Plasma membranes**; Phosphatidic acid phosphatase (type 2); Signal transduction; haloperoxidase; phosphatase superfamily **98**, 119

**PLD2**; Phospholipase D; PLD1; ARF; Rho; Protein kinase C **98**, 127

**PLD1**; Phospholipase D; PLD2; ARF; Rho; Protein kinase C **98**, 127

**Pleckstrin homology domain**; Membrane association; Ins(1,4,5)$P_3$; Phosphoinositide; G protein **98**, 35

**Protein kinase C**; Phospholipase D; PLD1; PLD2; ARF; Rho **98**, 127

**Rho**; Phospholipase D; PLD1; PLD2; ARF; Protein kinase C **98**, 127

**Second messengers**; Phosphatidylinositol; Phospholipids; Lipid kinase; Signal transduction **98**, 69

**Signal transduction**; Diacylglycerol kinases; Phosphatidic acid **98**, 95

**Signal transduction**; G protein; Phosphoinositide 3-kinase; Tyrosine kinase **98**, 79

**Signal transduction**; Phosphatidic acid phosphatase (type 2); Plasma membranes; haloperoxidase; phosphatase superfamily **98**, 119

**Signal transduction**; Phosphatidylinositol; Phospholipase C; Exocytosis; Vesicle formation; Phosphoinositide 3-kinase **98**, 23

**Signal transduction**; Phosphatidylinositol; Phospholipids; Lipid kinase; Second messengers **98**, 69

**Signal transduction**; Phosphoinositide; Zinc finger; PI 3-kinase; Membrane traffic **98**, 87

**Signal transduction**; Phospholipase D; Differentiation; Apoptosis **98**, 153

**Synaptotagmin**; Neurotransmitter release; Neurite outgrowth **98**, 59

**Tyrosine kinase**; G protein; Phosphoinositide 3-kinase; Signal transduction **98**, 79

**Vesicle formation**; Phosphatidylinositol; Phospholipase C; Exocytosis; Phosphoinositide 3-kinase; Signal transduction **98**, 23

**Vesicle transport**; Phospholipase D; Phosphatidic acid; Phosphatidylinositol (4,5)bisphosphate; Diacylglycerol; ADP-ribosylation factor **98**, 141

**Zinc finger**; Phosphoinositide; PI 3-kinase; Membrane traffic; Signal transduction **98**, 87
